Serious game viewing

The location of Narina Lodge is known for having the highest recorded densities of wildlife per square hectare. The reserve is untamed and untainted, as a result, guests are treated to regular sightings, often a few metres from the open Land Rover. Guides are expertly trained to not only provide you with a wealth of information on all aspects of the ecology, but are also well versed in being incredible hosts, passionate about making sure guests' highest expectations are met.

There are two game drives daily: one in the morning and the other in the late afternoon moving into the early evening when the wildlife are most active. The area is not affected by a migration of species and, as a result, game viewing is consistently good all year round.

New heights

Chalkley Treehouse offers guests a unique experience, providing a closer connection to the landscape. The tree house is a secure and lavish platform under the vast African sky, with all the comforts that a guest can experience at a five-star bush lodge.
