We have learned that one of the most special ways to experience a safari is with the family, but often the accommodations at lodges don't suitably cater to this unique market sector. As parents, we understand that children seldom fit into schedule, and that each of their personalities and needs are unique.

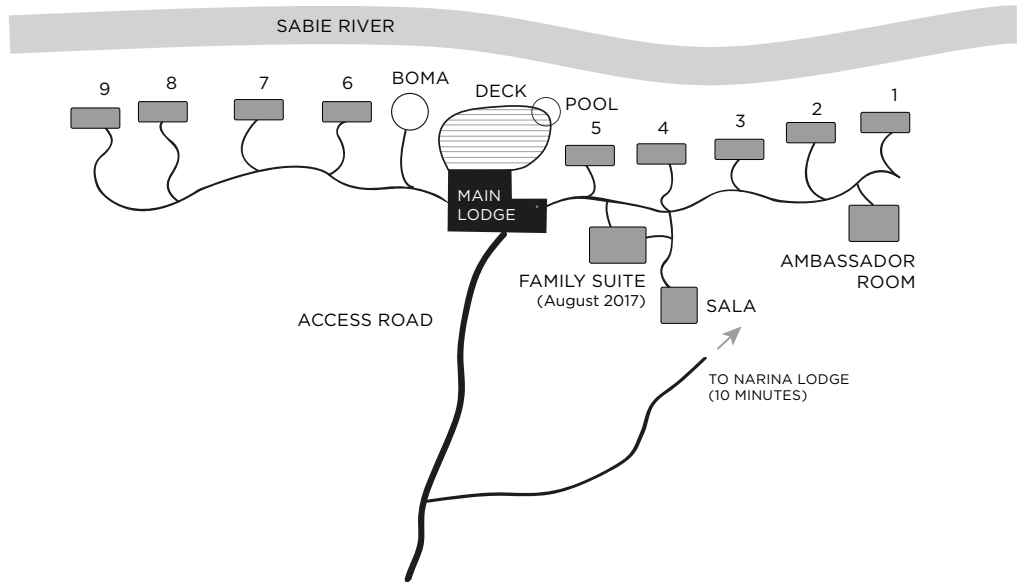

It gives us great pleasure to introduce you to Tinga Lodge's Hi'Nkweni Family Villa. Not only does the lodge lend itself, in both atmosphere and architecture, to the family traveller (specifically with younger children), but this exclusive and self-contained Villa also comes with its own safari vehicle and Field Guide, giving guests the flexibility to craft their own experience. Safety is always front-and-centre for juniors, with no dangerous raised walkways, and a walled-in indigenous garden with private pool.

We are very excited about bringing this to market, as there are few things we love more than watching a family bonding, making memories and having an incredible time together while with us on safari.
